

# 4 Axis CNC Drilling & Milling Machine

IMT-HT-4X-CNC3000AT

## FEATURES :

- This product is paired with Taiwan Jingke Ethercat bus system, with a 15" large screen human interface operation; the moving axis adopts absolute value servo to ensure stability, accuracy, and anti-interference characteristics. Simple operation input, no programming method, making processing simpler and more intelligent.
- The machine tool is equipped with 6 straight row tool libraries for easy automatic replacement of the required tools, the spindle motor can achieve integrated multifunctional machining of drilling, milling and tapping
- Mainly widely used in Aluminium alloy profiles, industrial aluminium deep processing, and non-ferrous metal processing of copper products.
